

NEW!

2X SWING-OUT AUXILIARY LENS

For All Series Cycloptic Stereoscopic Microscopes

Providing great convenience in changing magnifications, the new 2X Swing-Out Auxiliary Lens is readily mounted to standard objective by means of a simple clamping device. Its swing-out assembly permits the user to flip it in and out of the optical path at will. This completely eliminates the necessity of attaching and removing a separate auxiliary lens in covering the complete range of magnifications possible with the Cycloptic Series.

The new No. 264 Swing-Out Auxiliary Lens can be added to any existing Cycloptic (Series 52, 53, 56, 58, 59 and 55). It can be substituted for No. 265 2X Auxiliary Lens-attachment in any of the "D" outfits for an additional \$21.00. The working distance of the No. 264 is the same as that provided by No. 265 (1.5").

Cat. No.	Description	Price
264	2X Swing-Out Auxiliary Lens for Cycloptic	\$55.00
